Multics Wikipedia

December 7th, 2018 -

Multics is a time-sharing operating system developed at MIT in the mid-1960s. It was one of the first operating systems to be designed specifically for time-sharing. The system was designed to allow multiple users to share the resources of a computer system. It was developed by a team of researchers led by Ivan Sutherland and Peter Denning. The system was first implemented in 1964 and was used by a large number of users at MIT and other institutions. It was one of the most successful time-sharing systems of its era and was widely used for many years.
